4. Regulatory Disclaimers & Operational Scope

LEGAL & COMPLIANCE NOTICE: *VeriCore is an AI-powered regulatory decision-support system built for demonstration during the Smart India Hackathon (SIH26261). It assists human reviewers in extracting structured data, verifying completeness, calculating temporal validity, and detecting cross-document inconsistencies. The system does NOT constitute statutory authorization or an autonomous regulatory grant. Reference comparisons are performed against clearly marked synthetic mock records and do not connect to live AICTE government production databases without an authorized API bridge. Final authority rests solely with the statutory approval council.*
